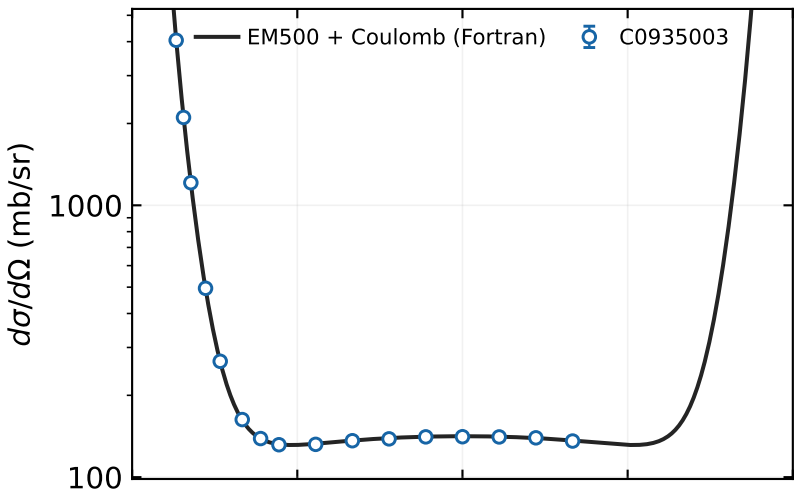
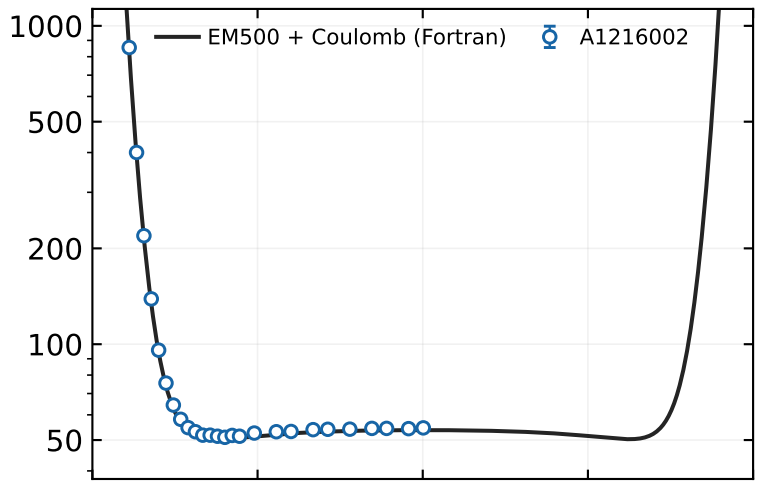
Proton–proton elastic scattering: experiment and EM500 (Fortran)

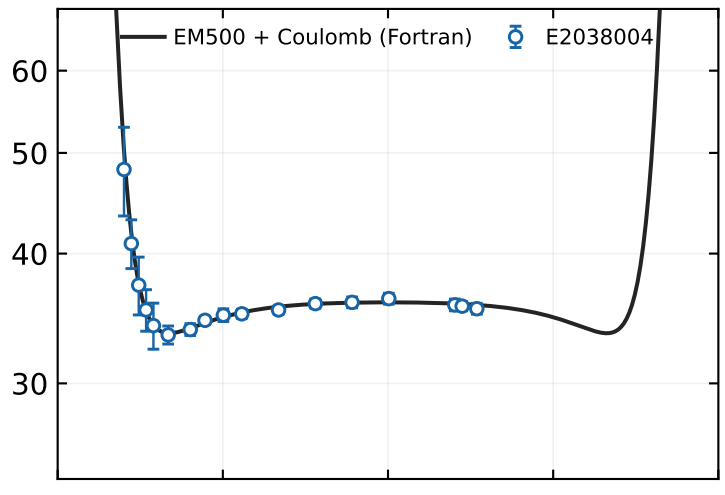
(a) E_p^{lab} = 3.037 MeV



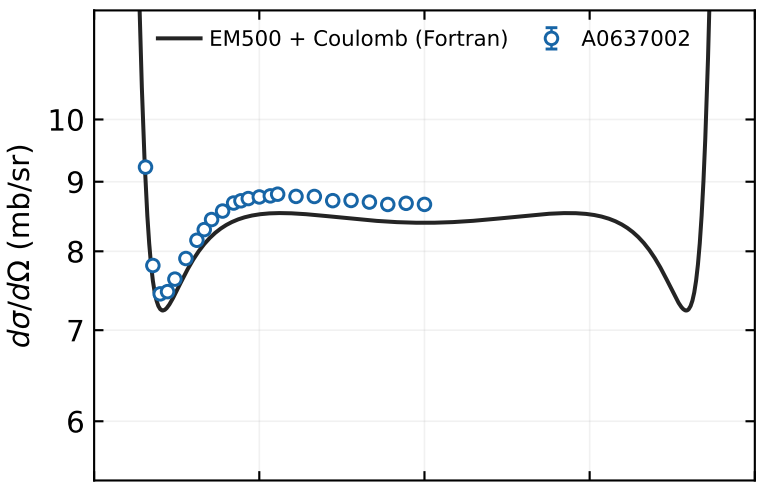
(b) E_p^{lab} = 9.69 MeV



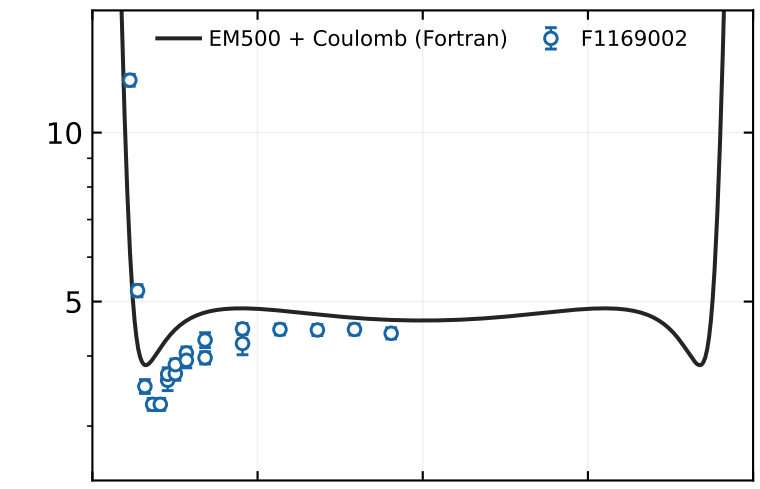
(c) E_p^{lab} = 14.16 MeV



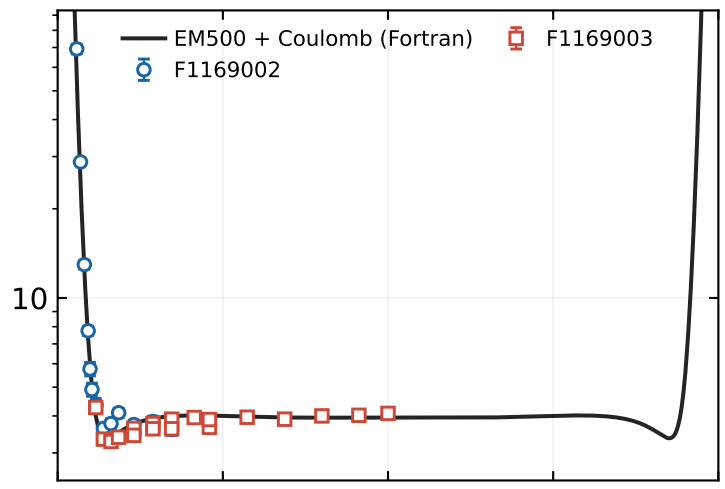
(d) E_p^{lab} = 50.06 MeV



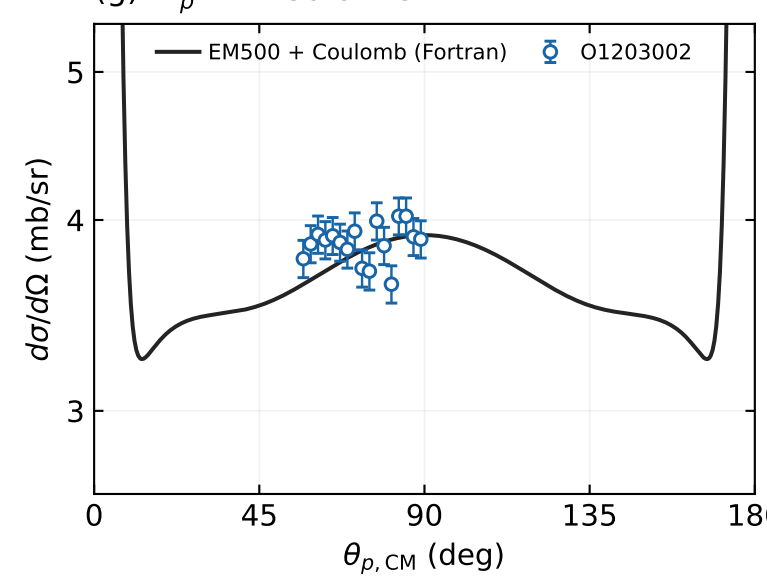
(e) E_p^{lab} = 98 MeV



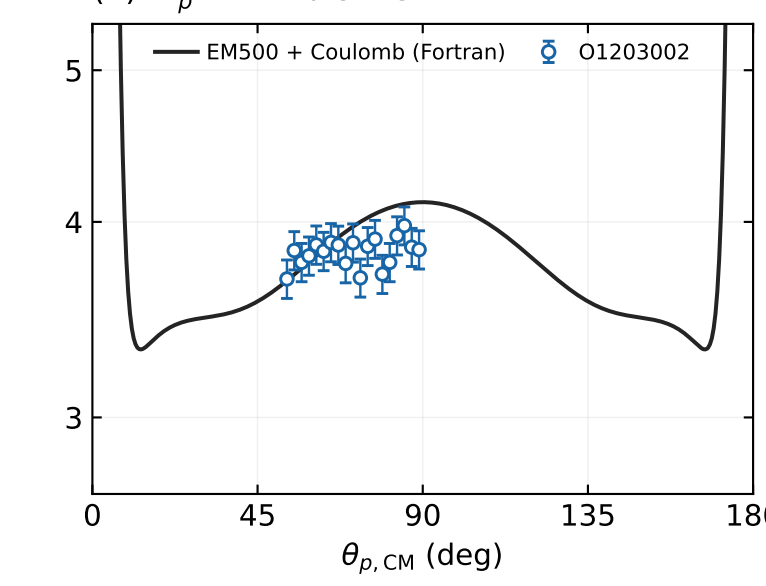
(f) E_p^{lab} = 142 MeV



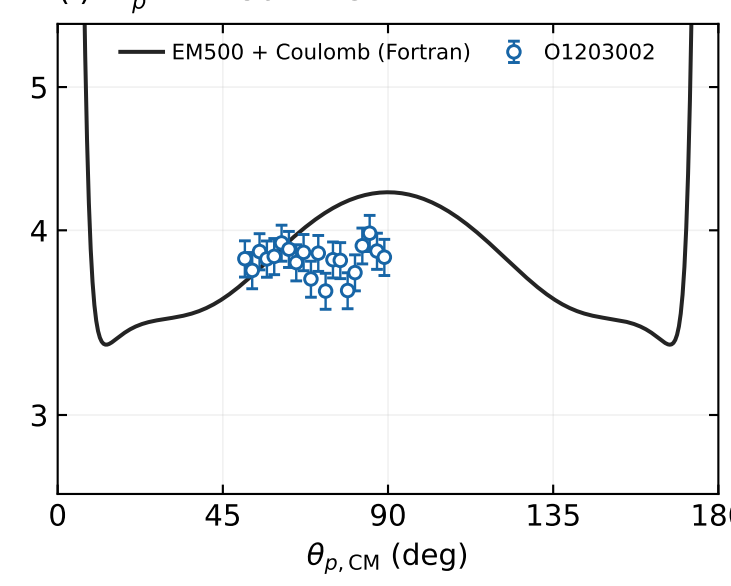
(g) E_p^{lab} = 239.9 MeV



(h) E_p^{lab} = 270.8 MeV



(i) E_p^{lab} = 286.7 MeV



CM outgoing-proton angles; logarithmic y axes. Symbols: experimental datasets. Bars: reported uncertainties; common scale errors remain separate.
Coulomb divergence near 0/180 deg is clipped by the vertical display range; no fitted theory normalization.
